Canacepa
Canacepa

Highly motivated junior full stack developer with a background in tourism seeking a challenging position in a dynamic organization. With experience in customer service and operations within the tourism industry, I possess strong communication and problem-solving skills. I am committed to creating robust and user-friendly web applications.

Projects

Enchanted Decks

HTML · CSS · JAVASCRIPT · REACT · REST API · EXPRESS · MONGODB

Enchanted Decks is a platform designed for Magic: The Gathering fans to create, share and play with custom decks of cards. With a user-friendly interface, users can easily browse and search for decks based on different criteria. Enchanted Decks also allows users to create events and invite other players to join in.

ChapterVerse

HTML · CSS · JAVASCRIPT · API · EXPRESS · MONGODB

Platform for book lovers to create and share their personal collections of books. With ChapterVerse, users can easily create their own virtual bookshelves, categorize their books, and share their collections with others.

Alien Explorer

HTML · CSS · JAVASCRIPT · CANVAS

Classic platformer game that features a range of levels and obstacles that players must navigate through while controlling an alien character. With DOM manipulation, the game responds dynamically to user input.
